FOR IMMEDIATE RELEASE

SUN COMMUNITIES, INC. REPORTS 2004 RESULTS

Southfield, MI, February 24, 2005 - Sun Communities, Inc. (NYSE: SUI), a real estate investment trust (REIT) that owns and operates manufactured housing communities, today reported fourth quarter and year ended December 31, 2004 results.

Income from rental property increased 5.5 percent to \$167.8 million for the year ended December 31, 2004 from \$159.1 million for the year ended December 31, 2003. Net loss for the year ended December 31, 2004 was \$(40.5) million or \$(2.21) per common share compared to net income of \$23.7 million or \$1.29 per diluted common share during 2003. Funds from operations (FFO)⁽¹⁾ was \$(3.3) million, or \$(0.16) per share/OP Unit for the year ended December 31, 2004; a decrease from FFO of \$65.5 million, or \$3.14 per diluted share/OP Unit for the year ended December 31, 2003. The decreases in net income and FFO are due largely to charges of \$51.6 million for prepayment costs, fees and related expenses and \$5.6 million of deferred financing costs associated with the repurchase of \$345 million of unsecured debt in the second quarter of 2004 and the associated recapitalization of the Company. Excluding these costs, FFO for 2004 would have been \$53.9 million or \$2.57 per diluted share/OP unit and net income would have been \$16.7 million or \$0.91 cents per diluted common share.

During the fourth quarter ended December 31, 2004, income from rental property increased 9.6 percent to \$43.5 million, compared with \$39.7 million in the fourth quarter of 2003. Income from continuing operations for the fourth quarter of 2004 was \$1.3 million or \$0.07 per diluted common share, compared with loss of \$(2.6) million, or \$(0.14) per diluted common share for the same period in 2003. Funds from continuing operations decreased from \$11.7 million, or \$0.55 per diluted share/OP Unit in the fourth quarter 2003 to \$10.3 million, or \$0.50 per diluted share/OP Unit in the fourth quarter 2004.

February 24, 2005

Page 2

For 108 communities owned throughout both years, total revenues increased 4.0 percent for the year ended December 31, 2004 and expenses increased 3.4 percent, resulting in an increase in net operating income⁽²⁾ of 4.25 percent. Same property occupancy in the manufactured housing sites decreased from 88.4 percent at September 30, 2004 to 87.4 percent at December 31, 2004.

As previously noted the Company completed a significant restructuring of its capital and operating debt during 2004. Secured debt financings of \$734 million with average terms approximating 10 years and weighted average interest rates of approximately 5.0% were concluded, as well as the successful negotiation of a new \$115 million revolving line of credit at LIBOR + 1.75%. Proceeds from the secured financings were used to retire existing debt, acquire communities, and repurchase the Company's stock. The Company has also provided the required notice to retire \$50 million of 8.875% perpetual preferred partnership units during the first quarter of 2005 and is authorized to repurchase up to 1 million additional shares of its stock.

During 2004 the Company acquired nine manufactured housing communities comprising approximately 2950 developed and 570 undeveloped sites. The aggregate purchase price was \$120.4 million and included the assumption of approximately \$34.3 million in debt. Three of the communities are in northeast Atlanta, four are located in Michigan and the remaining properties are located in Colorado and Texas.

"While we looked for a year of industry transition, manufactured housing conditions never reversed, but did seem to stabilize during 2004. Home shipments, repossessions, finance company recoveries and delinquencies ended the year at similar or slightly improved levels over 2003. The first half of the year reflected strongly improving occupancy statistics in the Company's portfolio, the second half suffered from another surge of repossessed homes, depressing overall occupancy. Performance of the same site portfolio was one bright spot in an otherwise difficult manufactured home environment." said Gary A. Shiffman, Chief Executive Officer.

"This past year marks many significant accomplishments that position the Company to regain positive year over year FFO growth. Putting both the refinancing and implementation of an entirely new software system in both accounting and operations behind us, management is focused on its leasing and sales efforts, as well as acquisition opportunities. While it remains early, the overall portfolio has had a net gain of 61 sites so far this year." Shiffman added.

Through February 19, 2005, the Company has added 61 net leased sites which represents five weeks of positive performance after losses of 42 net sites in the first two weeks of the year. This leasing rate, if maintained, will result in 445 net leased sites which is the plan for 2005. For the first fifty days of the year, the Company has averaged leasing gains and losses of 7.8 and 6.6 per day, respectively.

The Company stands by its previously issued earnings guidance.

February 24, 2005

Page 3

A conference call to discuss fourth quarter and year-end operating results will be held on February 24, 2005, at 11:00 A.M. EST. To participate, call toll-free 877-407-9039. Callers outside the U.S. or Canada can access the call at 201-689-8359. A replay will be available following the call through March 10, 2005, and can be accessed by dialing 877-660-6853 from the U.S. or 201-612-7415 outside the U.S. or Canada. The account number for the replay is 3055 and the ID number is 135176. The conference call will be available live on Sun Communities website www.suncommunities.com. Replay will also be available on the website.

Sun Communities currently owns and operates a portfolio of 136 communities mainly in the Midwest and Southeast United States. The Company's properties are comprised of over 46,800 developed sites and approximately 7,300 additional sites available for development.

⁽¹⁾ Funds from operations ("FFO") is defined by the National Association of Real Estate Investment Trusts ("NAREIT") as net income (computed in accordance with generally accepted accounting principles), excluding gains (or losses) from sales of depreciable operating property, plus real estate-related depreciation and amortization, and after adjustments for unconsolidated partnerships and joint ventures. FFO is a non-GAAP financial measure that management believes is a useful supplemental measure of the Company's operating performance. Management generally considers FFO to be a useful measure for reviewing comparative operating and financial performance because, by excluding gains and losses related to sales of previously depreciated operating real estate assets and excluding real estate asset depreciation and amortization (which can vary among owners of identical assets in similar condition based on historical cost accounting and useful life estimates), FFO provides a performance measure that, when compared year over year, reflects the impact to operations from trends in occupancy rates, rental rates and operating costs, providing perspective not readily apparent from net income. Management believes that the use of FFO has been beneficial in improving the understanding of operating results of REITs among the investing public and making comparisons of REIT operating results more meaningful.

Because FFO excludes significant economic components of net income including depreciation and amortization, FFO should be used as an adjunct to net income and not as an alternative to net income. The principal limitation of FFO is that it does not represent cash flow from operations as defined by GAAP and is a supplemental measure of performance that does not replace net income as a measure of performance or net cash provided by operating activities as a measure of liquidity. In addition, FFO is not intended as a measure of a REIT's ability to meet debt principal repayments and other cash requirements, nor as a measure of working capital. FFO only provides investors with an additional performance measure. Other REITS may use different methods for calculating FFO and, accordingly, the Company's FFO may not be comparable to other REITs.

⁽²⁾ Investors in and analysts following the real estate industry utilize net operating income ("NOI") as a supplemental performance measure. NOI is derived from revenues (determined in accordance with GAAP) minus property operating expenses and real estate taxes (determined in accordance with GAAP). NOI does not represent cash generated from operating activities in accordance with GAAP and should not be considered to be an alternative to net income (determined in accordance with GAAP) as an indication of the Company's financial performance or to be an alternative to cash flow from operating activities (determined in accordance with GAAP) as a measure of the Company's liquidity; nor is it indicative of funds available for the Company's cash needs, including its ability to make cash distributions. The Company believes that net income is the most directly comparable GAAP measurement to net operating income. Because of the inclusion of items such as interest, depreciation and amortization, the use of net income as a performance measure is limited as these items may not accurately reflect the actual change in market value of a property, in the case of depreciation and in the case of interest, may not necessarily be linked to the operating performance of a real estate asset, as it is often incurred at a parent company level and not at a property level

February 24, 2005

Page 4

The Company believes that net operating income is helpful to investors as a measure of operating performance because it is an indicator of the return on property investment, and provides a method of comparing property performance over time. The Company uses NOI as a key management tool when evaluating performance and growth of particular properties and/or groups of properties. The principal limitation of NOI is that it excludes depreciation, amortization and non-property specific expenses such as general and administrative expenses, all of which are significant costs, and therefore, NOI is a measure of the operating performance of the properties of the Company rather than of the Company overall.

-FINANCIAL TABLES FOLLOW-**

This press release contains various “forward-looking statements” within the meaning of the Securities Act of 1933 and the Securities Exchange Act of 1934, and the Company intends that such forward-looking statements will be subject to the safe harbors created thereby. For this purpose, any statements contained in this press release that relate to prospective events or developments are deemed to be forward-looking statements. Words such as “believes,” “forecasts,” “anticipates,” “intends,” “plans,” “expects,” “will” and similar expressions are intended to identify forward-looking statements. These forward-looking statements reflect the Company’s current views with respect to future events and financial performance, but involve known and unknown risks and uncertainties, both general and specific to the matters discussed in this press release. These risks and uncertainties may cause the actual results of the Company to be materially different from any future results expressed or implied by such forward looking statements. Such risks and uncertainties include the national, regional and local economic climates, the ability to maintain rental rates and occupancy levels, competitive market forces, changes in market rates of interest, the ability of manufactured home buyers to obtain financing, the level of repossessions by manufactured home lenders and those referenced under the headings entitled “Factors That May Affect Future Results” or “Risk Factors” contained in the Company’s filings with the Securities and Exchange Commission. The forward-looking statements contained in this press release speak only as of the date hereof and the Company expressly disclaims any obligation to provide public updates, revisions or amendments to any forward-looking statements made herein to reflect changes in the Company’s expectations of future events.

⁽³⁾ The Company entered into three interest rate swaps and an interest rate cap agreement. The valuation adjustment reflects the theoretical noncash profit and loss were those hedging transactions terminated at the balance sheet date. As the Company has no expectation of terminating the transactions prior to maturity, the net of these noncash valuation adjustments will be zero at the various maturities. As any imperfection related to hedging correlation in these swaps is reflected currently in cash as interest, the valuation adjustments reflect volatility that would distort the comparative measurement of FFO and on a net basis approximate zero. Accordingly, the valuation adjustments are excluded from Funds from Operations. The valuation adjustment is included in interest expense.

⁽⁴⁾ The Company acquired the equity interest of another investor in SunChamp in December 2002. Consideration consisted of a long-term note payable at net book value. Although the adjustment for the allocation of the SunChamp losses (based on SunChamp as a stand-alone entity) is not reflected in the accompanying financial statements, management believes that it is appropriate to provide for this adjustment because the Company's payment obligations with respect to the note are subordinate in all respects to the return of the members' equity (including the gross book value of the acquired equity) plus a preferred return. As a result, the losses that are allocated to the Company from SunChamp as a stand-alone entity under generally accepted accounting principles are effectively reallocated to the note for purposes of calculating Funds from Operations. A situation such as this is not contemplated in the NAREIT definition of FFO due to the unique circumstances of the transaction. Although not comparable to the precise NAREIT definition, the Company believes the inclusion of this item in its calculation of FFO to be appropriate as noted above.

⁽³⁾ The Company entered into three interest rate swaps and an interest rate cap agreement. The valuation adjustment reflects the theoretical noncash profit and loss were those hedging transactions terminated at the balance sheet date. As the Company has no expectation of terminating the transactions prior to maturity, the net of these noncash valuation adjustments will be zero at the various maturities. As any imperfection related to hedging correlation in these swaps is reflected currently in cash as interest, the valuation adjustments reflect volatility that would distort the comparative measurement of FFO and on a net basis approximate zero. Accordingly, the valuation adjustments are excluded from Funds from Operations. The valuation adjustment is included in interest expense.

⁽⁴⁾ The Company acquired the equity interest of another investor in SunChamp in December 2002. Consideration consisted of a long-term note payable at net book value. Although the adjustment for the allocation of the SunChamp losses (based on SunChamp as a stand-alone entity) is not reflected in the accompanying financial statements, management believes that it is appropriate to provide for this adjustment because the Company's payment obligations with respect to the note are subordinate in all respects to the return of the members' equity (including the gross book value of the acquired equity) plus a preferred return. As a result, the losses that are allocated to the Company from SunChamp as a stand-alone entity under generally accepted accounting principles are effectively reallocated to the note for purposes of calculating Funds from Operations. A situation such as this is not contemplated in the NAREIT definition of FFO due to the unique circumstances of the transaction. Although not comparable to the precise NAREIT definition, the Company believes the inclusion of this item in its calculation of FFO to be appropriate as noted above.

(in thousands)

Notes	A	B	C	D	E	
	Recurring Cap Ex. Average Per Site	<u>Recurring Cap Ex.</u>	<u>Lot Mods</u>	<u>Acq.</u>	<u>Expansions & Dev.</u>	<u>Revenue Producing</u>
2002	\$168	\$7,102	\$2,630	\$70,653	\$24,500	\$7,833
2003	\$148	\$ 6,491	\$2,343	\$4,514	\$14,426	\$1,897
2004	\$147	\$ 6,594	\$3,996	\$120,086	\$9,743	\$883

- A. Includes capital expenditures necessary to maintain asset quality, including purchasing and replacing assets used to operate the community. These capital expenditures include major road, driveway, and pool repairs, clubhouse renovations, and adding or replacing street lights, playground equipment, signage, maintenance facilities, manager housing and property vehicles. Minimum capitalizable amount or project is \$500. Excludes \$1,700,000 related to main office move in 2003 and software conversion costs of \$3,400,000 and \$442,894 in 2003 and 2004 respectively.
- B. Includes capital expenditures which improve the asset quality of the community. These costs are incurred when an existing older home (usually a smaller single-sectional home) moves out, and the site is prepared for a larger new home, more often than not, a multi-sectional home. These activities which are mandated by strict manufacturer's installation requirements and State building code include new foundations, driveways, and utility upgrades. The new home will be in the community for 30 to 40 years and these costs are depreciated over a 30 year life.
- C. Acquisitions represent the purchase price of existing operating communities and land parcels to develop expansions or new communities. Acquisitions also include deferred maintenance identified during due diligence and those capital improvements necessary to bring the community up to Sun's standards. These include upgrading clubhouses, landscaping, new street light systems, new mailing delivery systems, pool renovation including larger decks, heaters, and furniture, new maintenance facilities, and new signage including main signs and internal road signs. These are considered as acquisition costs and while identified during due diligence, it sometimes requires six to twelve months after closing to complete.
- D. These are the costs of developing expansions and new communities.
- E. These are capital costs related to revenue generating activities, consisting primarily of cable TV, garages, sheds, and sub-metering of water and sewer. Occasionally, a special capital project requested by residents and accompanied by an extra rental increase will be classified as revenue producing. Capitalized revenue generating expenditures made by Sun Home Services, Inc. are excluded from this amount.

SUN COMMUNITIES, INC.
FOOTNOTES TO SUPPLEMENTAL DATA

- (1) Investors in and analysts following the real estate industry utilize funds from operations (“FFO”), net operating income (“NOI”), EBITDA and funds available for distribution (“FAD”) as supplemental performance measures. While the Company believes net income (as defined by GAAP) is the most appropriate measure, it considers FFO, NOI, EBITDA and FAD, given their wide use by and relevance to investors and analysts, appropriate supplemental measures. FFO, reflecting the assumption that real estate values rise or fall with market conditions, principally adjusts for the effects of GAAP depreciation/amortization of real estate assets. NOI provides a measure of rental operations and does not factor in depreciation/amortization and non-property specific expenses such as general and administrative expenses. EBITDA provides a further tool to evaluate ability to incur and service debt and to fund dividends and other cash needs. FAD provides a further tool to evaluate ability to fund dividends. In addition, FFO, NOI, EBITDA and FAD are commonly used in various ratios, pricing multiples/yields and returns and valuation calculations used to measure financial position, performance and value.

Funds from operations (“FFO”) is defined by the National Association of Real Estate Investment Trusts (“NAREIT”) as net income (computed in accordance with generally accepted accounting principles), excluding gains (or losses) from sales of depreciable operating property, plus real estate-related depreciation and amortization, and after adjustments for unconsolidated partnerships and joint ventures. FFO is a non-GAAP financial measure that management believes is a useful supplemental measure of the Company’s operating performance. Management generally considers FFO to be a useful measure for reviewing comparative operating and financial performance because, by excluding gains and losses related to sales of previously depreciated operating real estate assets and excluding real estate asset depreciation and amortization (which can vary among owners of identical assets in similar condition based on historical cost accounting and useful life estimates), FFO provides a performance measure that, when compared year over year, reflects the impact to operations from trends in occupancy rates, rental rates and operating costs, providing perspective not readily apparent from net income. Management believes that the use of FFO has been beneficial in improving the understanding of operating results of REITs among the investing public and making comparisons of REIT operating results more meaningful.

Because FFO excludes significant economic components of net income including depreciation and amortization, FFO should be used as an adjunct to net income and not as an alternative to net income. The principal limitation of FFO is that it does not represent cash flow from operations as defined by GAAP and is a supplemental measure of performance that does not replace net income as a measure of performance or net cash provided by operating activities as a measure of liquidity. In addition, FFO is not intended as a measure of a REIT’s ability to meet debt principal repayments and other cash requirements, nor as a measure of working capital. FFO only provides investors with an additional performance measure that, when combined with measures computed in accordance with GAAP such as net income, cash flow from operating activities, investing activities and financing activities, provide investors with an indication of the Company’s ability to service debt and to fund acquisitions and other expenditures. Other REITs may use different methods for calculating FFO and, accordingly, the Company’s FFO may not be comparable to other REITs.

NOI is derived from revenues (determined in accordance with GAAP) minus property operating expenses and real estate taxes (determined in accordance with GAAP). NOI does not represent cash generated from operating activities in accordance with GAAP and should not be considered to be an alternative to net income (determined in accordance with GAAP) as an indication of the Company’s financial performance or to be an alternative to cash flow from operating activities (determined in accordance with GAAP) as a measure of the Company’s liquidity; nor is it indicative of funds available for the Company’s cash needs, including its ability to make cash distributions. The Company believes that net income is the most directly comparable GAAP measurement to net operating income. Because of the inclusion of items such as interest, depreciation and amortization, the use of net income as a performance measure is limited as these items may not accurately reflect the actual change in market value of a property, in the case of depreciation and in the case of interest, may not necessarily be linked to the operating performance of a real estate asset, as it is often incurred at a parent company level and not at a property level. The Company believes that net operating income is helpful to investors as a measure of operating performance because it is an indicator of the return on property investment, and provides a method of comparing property performance over time. The Company uses NOI as a key management tool when evaluating performance and growth of particular properties and/or groups of properties. The principal limitation of NOI is that it excludes depreciation, amortization and non-property specific expenses such as general and administrative expenses, all of which are significant costs, and therefore, NOI is a measure of the operating performance of the properties of the Company rather than of the Company overall.

EBITDA is defined as NOI plus other income, plus (minus) equity earnings (loss) from affiliates, minus general and administrative expenses. EBITDA includes EBITDA from discontinued operations.

FAD is defined as FFO minus recurring capital expenditures. Recurring capital expenditures are those expenditures necessary to maintain asset quality, including major road, driveway and pool repairs, clubhouse renovations and adding or replacing street lights, playground equipment, signage and maintenance facilities.

FFO, NOI, EBITDA and FAD do not represent cash generated from operating activities in accordance with GAAP and are not necessarily indicative of cash available to fund cash needs, including the repayment of principal on debt and payment of dividends and distributions. FFO, NOI, EBITDA and FAD should not be considered as substitutes for net income (calculated in accordance with GAAP) as a measure of results of operations or cash flows (calculated in accordance with GAAP) as a measure of liquidity. FFO, NOI, EBITDA and FAD as calculated by the Company may not be comparable to similarly titled, but differently calculated, measures of other REITs or to the definition of FFO published by NAREIT.
