## PART I

## ITEM 1. BUSINESS

## GENERAL

Sun Communities, Inc. and its subsidiaries (collectively, the "Company") own, operate and finance manufactured housing communities concentrated in the midwestern and southeastern United States. The Company is a fully integrated real estate company which, together with its affiliates and predecessors, has been in the business of acquiring, operating and expanding manufactured housing communities since 1975. At December 31, 2000, the Company owned and operated or financed a portfolio of 109 developed properties located in fifteen states (the "Properties"), including 99 manufactured housing communities, 5 recreational vehicle communities, and 5 properties containing both manufactured housing and recreational vehicle sites. At December 31, 2000, the Properties contained an aggregate of 38,282 developed sites comprised of 33,620 developed manufactured home sites and 4,662 recreational vehicle sites and an additional 2,392 manufactured home sites suitable for development. In addition, at December 31, 2000, the Company owned four undeveloped properties on which the Company plans to develop an aggregate of approximately 1,856 manufactured home sites. In order to enhance property performance and cash flow, the Company, through Sun Home Services, Inc., a Michigan corporation ("Home Services" or "SHS"), actively markets and sells new and used manufactured homes for placement in the Properties.

The Company made an election to be taxed as a REIT for federal income tax purposes commencing with the calendar year beginning January 1, 1994, and is self-administered and self-managed.

The Company's executive and principal property management office is located at 31700 Middlebelt Road, Suite 145, Farmington Hills, Michigan 48334 and its telephone number is (248) 932-3100. The Company has regional property management offices located in Austin, Texas, Dayton, Ohio, Grand Rapids, Michigan, Elkhart, Indiana and Orlando, Florida. The Company, which is a Maryland corporation, employed 513 people as of December 31, 2000.

## STRUCTURE OF THE COMPANY

The operations of the Company are carried on through certain subsidiaries (the "Subsidiaries"), including Sun Communities Operating Limited Partnership, a Michigan limited partnership (the "Operating Partnership"), which, among other things, enables the Company to comply with certain complex requirements under the Federal tax rules and regulations applicable to REITs. The Company established the Operating Partnership to allow the Company to acquire manufactured housing communities in transactions that defer some or all of the sellers' tax consequences. Substantially all of the Company's assets are held by or through the Operating Partnership, of which the Company is the sole general partner, as well as wholly-owned subsidiaries of the Company. In addition to the Operating Partnership, the Subsidiaries include Home Services, which provides manufactured home sales and other services to current and prospective tenants of the Properties. The Operating Partnership owns 100% of the non-voting preferred stock of Home Services, which entitles the Operating Partnership to 95% of the cash flow from operating activities of Home Services. The voting common stock of Home Services is currently owned by Gary A. Shiffman and Jeffrey P. Jorissen, executive officers of the Company, and the Estate of Milton M. Shiffman, a former executive officer of the Company, entitling them to the remaining 5% of such cash flow from operating activities. Sun

Water Oak Golf, Inc. ("Sun Golf") is a wholly-owned subsidiary of Home Services. Sun Golf was organized to own and operate the golf course, restaurant and related facilities located on the Water Oak Property that was acquired in November 1994.

#### THE MANUFACTURED HOUSING COMMUNITY INDUSTRY

A manufactured housing community is a residential subdivision designed and improved with sites for the placement of manufactured homes and related improvements and amenities. Manufactured homes are detached, single-family homes which are produced off-site by manufacturers and installed on sites within the community. Manufactured homes are available in a wide array of designs, providing owners with a level of customization generally unavailable in other forms of multi-family housing.

Modern manufactured housing communities, such as the Properties, contain improvements similar to other garden-style residential developments, including centralized entrances, paved streets, curbs and gutters, and parkways. In addition, these communities also often provide a number of amenities, such as a clubhouse, a swimming pool, shuffleboard courts, tennis courts, laundry facilities and cable television service.

The owner of each home in the Company's Properties leases the site on which the home is located. The Company owns the underlying land, utility connections, streets, lighting, driveways, common area amenities and other capital improvements and is responsible for enforcement of community guidelines and maintenance. Some of the Properties provide water and sewer service through public or private utilities, while others provide these services to residents from on-site facilities. Each owner within the Company's Properties is responsible for the maintenance of his or her home and leased site. As a result, capital expenditure needs tend to be less significant, relative to multi-family rental apartment complexes.

#### PROPERTY MANAGEMENT

The Company's property management strategy emphasizes intensive, hands-on management by dedicated, on-site district managers and community managers. The Company believes that this on-site focus enables it to continually monitor and address tenant concerns, the performance of competitive properties and local market conditions. Of the Company's 513 employees, 448 are located on-site as property managers, support staff, or maintenance personnel.

The Company's community managers are overseen by Brian W. Fannon, Chief Operating Officer, who has 31 years of property management experience, a Senior-Vice President-Operations, three Vice Presidents of Operations and nine Regional Property Managers. In addition, the Regional Property Managers are responsible for semi-annual market surveys of competitive communities, interaction with local manufactured home dealers and regular property inspections.

Each district or community manager performs regular inspections in order to continually monitor the property's physical condition and provides managers with the opportunity to understand and effectively address tenant concerns. In addition to a district or community manager, each district or property has an on-site maintenance personnel and management support staff. The Company holds periodic training sessions for all property management personnel to ensure that management policies are implemented effectively and professionally.

## HOME SALES

Home Services offers manufactured home sales services to tenants and prospective tenants of the Company's Properties. Since tenants often purchase a home already on-site within a community, such services enhance occupancy and property performance. Additionally, because many of the homes in the Properties are sold through Home Services, better control of home quality in the Company's communities can be maintained than if sales services were conducted solely through third-party brokers.

## REGULATIONS AND INSURANCE

General. Manufactured housing community properties are subject to various laws, ordinances and regulations, including regulations relating to recreational facilities such as swimming pools, clubhouses and other common areas. The Company believes that each Property has the necessary operating permits and approvals.

Americans with Disabilities Act ("ADA"). The Properties and any newly acquired manufactured housing communities must comply with the ADA. The ADA has separate compliance requirements for "public accommodations" and "commercial facilities," but generally requires that public facilities such as clubhouses, pools and recreation areas be made accessible to people with disabilities. Compliance with ADA requirements could require removal of access barriers and other capital improvements at the Company's properties. Noncompliance could result in imposition of fines or an award of damages to private litigants. The Company does not believe the ADA will have a material adverse impact on the Company's results of operations. If required property improvements involve a greater expenditure than the Company currently anticipates, or if the improvements must be made on a more accelerated basis than it anticipates, the Company's ability to make expected distributions could be adversely affected. The Company believes that its competitors face similar costs to comply with the requirements of the ADA.

Insurance. Management believes that the Properties are covered by adequate fire, flood, property and business interruption insurance provided by reputable companies and with commercially reasonable deductibles and limits. The Company maintains a blanket policy that covers all of the Properties. The Company has obtained title insurance insuring fee title to the Properties in an aggregate amount which the Company believes to be adequate.

## FACTORS THAT MAY AFFECT FUTURE RESULTS

The Company's prospects are subject to certain uncertainties and risks. This report also contains certain forward-looking statements within the meaning of the federal securities laws. The Company's future results could differ materially from its current results, and actual results could differ materially from those projected in the forward-looking statements as a result of certain risk factors. These risk factors include, but are not limited to, those set forth below, other one-time events and other important factors disclosed previously and from time to time in the Company's other filings with the Securities and Exchange Commission.

#### Conflicts of Interest.

**Failure to Enforce Terms of Home Services Agreement.** Gary A. Shiffman, President, Chief Executive Officer and Chairman of the Board of Directors of the Company, the Estate of Milton M. Shiffman (former Chairman of the Board of the Company), and Jeffrey P. Jorissen, Senior Vice President, Treasurer, Chief Financial Officer and Secretary of the Company, are the owners of all of the outstanding common stock of Home Services, and as such are entitled to 5% of the cash flow from the operating activities of Home Services (the Operating Partnership is entitled to 95% of such cash flow). Home Services has entered into an agreement with the Operating Partnership for sales, brokerage, and leasing services. Thus, Messrs. Shiffman and Jorissen will have a conflict of interest with respect to their obligations as officers and/or directors of the Company to enforce the terms of this services agreement due to their right to receive a portion of the cash flow from the operating activities of Home Services. The failure to enforce the material terms of this agreement could have an adverse effect on the Company.

**Tax Consequences Upon Sale of Properties.** Gary A. Shiffman, President, Chief Executive Officer and Chairman of the Board of Directors of the Company, holds limited partnership interests in the Operating Partnership ("Common OP Units") which were received in connection with the sale of 24 Properties the Company acquired from partnerships previously affiliated with him (the "Sun Partnerships"). Prior to any redemption of Common OP Units for the Company's common stock (the "Common Stock"), Mr. Shiffman will have tax consequences different from those of the Company and its public stockholders on the sale of any of the Sun Partnerships. Therefore, Mr. Shiffman and the Company, as partners in the Operating Partnership, may have different objectives regarding the appropriate pricing and timing of any sale of those Properties.

**Adverse Consequences of Being a Lender.** The Company provides financing to Bingham Financial Services Corporation ("Bingham"). Gary A. Shiffman, the Chairman of the Board and President and Chief Executive Officer of the Company, is a director and officer of Bingham, and Arthur A. Weiss, one of the Company's directors, is a director of Bingham. The financing consists of three separate facilities: a \$4.0 million subordinated term loan, bearing interest at the rate of 9.75% per annum (the "Term Loan"); a \$10.0 million subordinated demand line of credit, bearing interest at a rate of 235 basis points over LIBOR (the "\$10 Million Line"); and a \$50.0 million subordinated demand line of credit, bearing interest at a rate of 235 basis points over LIBOR (the "\$50 Million Line" and, together with the Term Loan and \$10 Million Line, the "Subordinated Debt Facilities"). The Term Loan matures on September 30, 2004. As of December 31, 2000, there was \$4.0 million outstanding under the Term Loan, no borrowings under the \$10 Million Line, and \$35.8 million outstanding under the \$50 Million Line. The Company has a subordinate security interest in the assets of Bingham to secure Bingham's obligations under the Subordinated Debt Facilities.

The Subordinated Debt Facilities subject the Company to the risks of being a lender. These risks include the risks relating to borrower delinquency and default and the adequacy of the collateral for such loans. Because the Subordinated Debt Facilities are subordinated to certain senior debt of Bingham, in the event Bingham was unable to meet its obligations under the senior debt facility, the Company's right to receive amounts owed to it under the Subordinated Debt Facilities would be suspended pending payment of the amounts owing under the senior debt facility. In addition, because the security interest securing Bingham's obligations under the Subordinated Debt Facilities is subordinate to the security interest of certain senior debt of Bingham, in the event of a bankruptcy of

Bingham, the Company's right to access Bingham's assets to satisfy the amounts outstanding under the Subordinated Debt Facilities would be subject to the senior debtor's prior rights to the same collateral.

Adverse Consequences of Being a Borrower. The Company is subject to the risks normally associated with debt financing, including the following risks:

- cash flow will be insufficient to meet required payments of principal and interest;
- existing indebtedness will not be able to be refinanced;
- the terms of such refinancing will not be as favorable as the terms of such existing indebtedness; and
- necessary capital expenditures for such purposes as renovations and other improvements will not be able to be financed on favorable terms or at all.

If a property is mortgaged to secure payment of indebtedness and the Company is unable to meet mortgage payments, the property could be transferred to the mortgagee with a consequent loss of income and asset value to the Company.

As of December 31, 2000, the Company had outstanding \$66.5 million of indebtedness that is collateralized by mortgage liens on sixteen of the Properties (the "Mortgage Debt"). In addition, as of December 31, 2000, the Company had entered into four capitalized lease obligations having an aggregate value of \$36.0 million. Each capitalized lease obligation involves a lease for a manufactured housing community providing that the Company will lease the community for a certain number of years and then have the option to purchase the community at or prior to the end of the lease term. In each case, if the Company fails to exercise its purchase right, the landlord has the right to require the Company to buy the property at the same price for which it had the purchase option. If the Company fails to meet its obligations under the Mortgage Debt, the lender would be entitled to foreclose on all or some of the Properties securing such debt. If the Company fails to satisfy its lease obligations or an obligation to purchase the property, the landlord/seller would be entitled to evict the Company from the property. In each event, this could have a material adverse effect on the Company and its ability to make expected distributions, and could threaten its continued viability.

Changes in Investment and Financing Policies Without Stockholder Approval. The Company's investment and financing policies, and its policies with respect to certain other activities, including growth, debt, capitalization, distributions, real estate investment trust ("REIT") status, and operating policies, are determined by the Board of Directors. Although the Board of Directors has no present intention to do so, these policies may be amended or revised from time to time at the discretion of the Board of Directors without notice to or a vote of the Company's stockholders. Accordingly, stockholders may not have control over changes in the Company's policies, and changes in the Company's policies may not fully serve the interests of all stockholders.

Dependence on Key Personnel. The Company is dependent on the efforts of its executive officers, particularly Gary Shiffman, Jeffrey Jorissen and Brian Fannon (together, the "Senior Officers"). While the Company believes that it could find replacements for these key personnel, the loss of their services could have a temporary adverse effect on the Company's operations. The Company does not currently maintain or contemplate obtaining any "key-man" life insurance on the Senior Officers.

#### Ownership Limit and Limits on Changes in Control.

9.8% Ownership Limit. In order to qualify and maintain its qualification as a REIT, not more than 50% of the outstanding shares of the Company's capital stock may be owned, directly or indirectly, by five or fewer individuals. Thus, ownership of more than 9.8% of the Company's outstanding shares of Common Stock by any single stockholder has been restricted, with certain exceptions, for the purpose of maintaining the Company's qualification as a REIT under the Internal Revenue Code of 1986, as amended (the "Code"). Such restrictions in the Company's charter do not apply to Mr. Shiffman, the Estate of Milton M. Shiffman and Robert B. Bayer, a former director and officer of the Company.

The 9.8% ownership limit, as well as the Company's ability to issue additional shares of Common Stock or shares of other stock (which may have rights and preferences over the Common Stock), may discourage a change of control of the Company and may also: (1) deter tender offers for the Common Stock, which offers may be advantageous to the Company's stockholders; and (2) limit the opportunity for stockholders to receive a premium for their Common Stock that might otherwise exist if an investor were attempting to assemble a block of Common Stock in excess of 9.8% of the outstanding shares of the Company or otherwise effect a change of control of the Company.

Staggered Board. The Board of Directors has been divided into three classes of directors. The term of one class will expire each year. Directors for each class will be chosen for a three-year term upon the expiration of such class's term, and the directors in the other two classes will continue in office. The staggered terms for directors may affect the stockholders' ability to change control of the Company even if a change in control were in the stockholders' interest.

Preferred Stock. The Company's charter authorizes the Board of Directors to issue up to 10,000,000 shares of preferred stock and to establish the preferences and rights (including the right to vote and the right to convert into shares of Common Stock) of any shares issued. The power to issue preferred stock could have the effect of delaying or preventing a change in control of the Company even if a change in control were in the stockholders' interest.

Rights Plan. The Company adopted a stockholders rights plan in 1998 that provides that the Company's stockholders (other than a stockholder attempting to acquire a 15% or greater interest in the Company) will have the right to purchase stock in the Company at a discount in the event any person attempts to acquire a 15% or greater interest in the Company. Because this plan could make it more expensive for a person to acquire a controlling interest in the Company, it could have the effect of delaying or preventing a change in control of the Company even if a change in control were in the stockholders' interest.

#### Real Estate Investment Considerations.

General. Income from real property investments, and the Company's ability to make expected distributions to stockholders, may be adversely affected by:

- the general economic climate;

- local conditions such as oversupply of manufactured housing sites or a reduction in demand for manufactured housing sites in an area;
- the attractiveness of the Properties to tenants;
- zoning or other regulatory restrictions;
- competition from other available manufactured housing sites and alternative forms of housing (such as apartment buildings and site-built single-family homes); or
- the ability to provide adequate maintenance and insurance, and increased operating costs (including insurance premiums and real estate taxes).

The Company's income would also be adversely affected if tenants were unable to pay rent or if sites were unable to be rented on favorable terms. If the Company were unable to promptly relet or renew the leases for a significant number of the sites, or if the rental rates upon such renewal or reletting were significantly lower than expected rates, then funds from operations and ability to make expected distributions to stockholders could be adversely affected. In addition, certain expenditures associated with each equity investment (such as real estate taxes and maintenance costs) generally are not reduced when circumstances cause a reduction in income from the investment. Furthermore, real estate investments are relatively illiquid and, therefore, will tend to limit the Company's ability to vary its portfolio in response to changes in economic or other conditions.

**Competition.** All of the Properties are located in developed areas that include other manufactured housing community properties. The number of competitive manufactured housing community properties in a particular area could have a material effect on the Company's ability to lease sites and on rents charged at the Properties or at any newly acquired properties. The Company competes with others with greater resources and whose officers and directors have more experience than its officers and directors. In addition, other forms of multi-family residential properties, such as private and federally funded or assisted multi-family housing projects and single-family housing, provide housing alternatives to potential tenants of manufactured housing communities.

**Changes in Laws.** Costs resulting from changes in real estate tax laws generally may be passed through to tenants and will not affect the Company. Increases in income, service or other taxes, however, generally are not passed through to tenants under leases and may adversely affect the Company's funds from operations and its ability to make distributions to stockholders. Similarly, changes in laws increasing the potential liability for environmental conditions existing on properties or increasing the restrictions on discharges or other conditions may result in significant unanticipated expenditures, which would adversely affect the Company's funds from operations and our ability to make distributions to stockholders.

**Investments in Real Estate and Installment Loans.** As of December 31, 2000, the Company had an investment of approximately \$49.1 million in real estate loans to several entities and Properties which are secured by a first lien on the underlying property. The Company holds subordinated notes for approximately \$11.4 million which are secured by a

lien on the underlying real estate subordinate to the lien held by the primary lender. Also, as of December 31, 2000, it had outstanding approximately \$32.4 million in installment loans to owners of manufactured homes. These installment loans are collateralized by the manufactured homes. In addition, the Company may invest in additional mortgages and installment loans in the future. By virtue of its investment in the mortgages and the loans, the Company is subject to the following risks of such investment:

- the borrowers may not be able to make debt service payments or pay principal when due;
- the value of property securing the mortgages and loans may be less than the amounts owed; and
- interest rates payable on the mortgages and loans may be lower than the Company's cost of funds.

If any of the above occurred, funds from operations and the Company's ability to make expected distributions to stockholders could be adversely affected.

**Development of New Communities.** The Company is engaged in the development of new communities. The manufactured housing community development business involves significant risks in addition to those involved in the ownership and operation of established manufactured housing communities, including the following risks:

- financing may not be available on favorable terms for development projects;
- construction and lease-up may not be completed on schedule resulting in increased debt service expense and construction costs;
- long-term financing may not be available upon completion of construction; and
- sites may not be leased on profitable terms.

If any of the above occurred, the Company's ability to make expected distributions to stockholders could be adversely affected.

**Rent Control Legislation.** State and local rent control laws in certain jurisdictions may limit the Company's ability to increase rents and to recover increases in operating expenses and the costs of capital improvements. Enactment of such laws has been considered from time to time in other jurisdictions. Certain Properties are located, and the Company may purchase additional properties, in markets that are either subject to rent control or in which rent-limiting legislation exists or may be enacted.

**Environmental Matters.** Under various Federal, state and local laws, ordinances and regulations, an owner of real estate is liable for the costs of removal or remediation of certain hazardous or toxic substances on or in such property. Such laws often impose such liability without regard to whether the owner knew of, or was responsible for, the presence

of such hazardous or toxic substances. The presence of such substances, or the failure to properly remediate such substances, may adversely affect the owner's ability to sell or rent such property or to borrow using such property as collateral. Persons who arrange for the disposal or treatment of hazardous or toxic substances may also be liable for the costs of removal or remediation of such substances at a disposal or treatment facility, whether or not such facility is owned or operated by such person. Certain environmental laws impose liability for release of asbestos-containing materials ("ACMs") into the air and third parties may seek recovery from owners or operators of real properties for personal injury associated with ACMs. In connection with the ownership (direct or indirect), operation, management, and development of real properties, the Company may be considered an owner or operator of such properties or as having arranged for the disposal or treatment of hazardous or toxic substances and, therefore, is potentially liable for removal or remediation costs, as well as certain other related costs, including governmental fines and injuries to persons and property.

All of the Properties have been subject to a Phase I or similar environmental audit (which involves general inspections without soil sampling or ground water analysis) completed by independent environmental consultants. These environmental audits have not revealed any significant environmental liability that would have a material adverse effect on the Company's business. No assurances can be given that existing environmental studies of the Properties reveal all environmental liabilities, that any prior owner of a Property did not create any material environmental condition not known to the Company, or that a material environmental condition does not otherwise exist as to any one or more Properties.

Uninsured Loss. The Company maintains comprehensive liability, fire, flood (where appropriate), extended coverage, and rental loss insurance coverage on the Properties with policy specifications, limits, and deductibles which are customarily carried for similar properties. Certain types of losses, however, may be either uninsurable or not economically insurable, such as losses due to earthquakes, riots, or acts of war. In the event an uninsured loss occurs, the Company could lose both its investment in and anticipated profits and cash flow from the affected property which could adversely affect the Company's ability to make distributions to its stockholders.

Adverse Consequences of Failure to Qualify as a REIT.

Taxation as a Corporation. The Company expects to qualify and has made an election to be taxed as a REIT under the Code, commencing with the calendar year beginning January 1, 1994. Although the Company believes that it is organized and will operate in such a manner, no assurance can be given that it is organized or will be able to operate in a manner so as to qualify or remain so qualified. Qualification as a REIT involves the satisfaction of numerous requirements (some on an annual and quarterly basis) established under highly technical and complex Code provisions for which there are only limited judicial or administrative interpretations, and involves the determination of various factual matters and circumstances not entirely within the Company's control.

If the Company were to fail to qualify as a REIT in any taxable year, it would be subject to Federal income tax (including any applicable alternative minimum tax) on its taxable income at corporate rates. Moreover, unless entitled to relief under certain statutory provisions,

it also would be disqualified from treatment as a REIT for the four taxable years following the year during which qualification is lost. This treatment would reduce the Company's net earnings available for investment or distribution to stockholders because of the additional tax liability of the Company for the years involved. In addition, distributions to stockholders would no longer be required to be made.

**Other Tax Liabilities.** Even though the Company qualifies as a REIT, it is subject to certain Federal, state and local taxes on its income and property. In addition, its sales operations, which are conducted through Home Services, generally will be subject to Federal income tax at regular corporate rates.

**REIT Modernization Act.** In December 1999, the REIT Modernization Act ("RMA") was signed into law. The RMA contains several provisions that will allow REIT's to create a taxable REIT subsidiary ("TRS") that can provide services to residents and others without disqualifying the rents that a REIT receives from its residents. Furthermore, RMA changes the minimum distribution requirement from 95 percent to 90 percent of the REIT's taxable income, which will allow REIT's to reinvest a larger percentage of capital into their real estate assets or repay their existing debt.

**Adverse Effect of Distribution Requirements.** The Company may be required from time to time, under certain circumstances, to accrue as income for tax purposes interest and rent earned, but not yet received. In such event, it could have taxable income without sufficient cash to enable the Company to meet the distribution requirements of a REIT. Accordingly, it could be required to borrow funds or liquidate investments on adverse terms in order to meet such distribution requirements.

**Adverse Consequences of Failure to Qualify as a Partnership.** The Company believes that the Operating Partnership and other various Company subsidiary partnerships have each been organized as partnerships and will qualify for treatment as such under the Code. If the Operating Partnership and such other partnerships fail to qualify for such treatment under the Code, the Company would cease to qualify as a REIT, and the Operating Partnership and such other partnerships would be subject to Federal income tax (including any alternative minimum tax) on their income at corporate rates.

**Adverse Effect on Price of Shares Available for Future Sale.** Sales of a substantial number of shares of Common Stock, or the perception that such sales could occur, could adversely affect prevailing market prices for shares. As of December 31, 2000, up to 4,091,889 shares of Common Stock may be issued in the future to the limited partners of the Operating Partnership (both Common and Preferred OP Units). The limited partners may sell such shares pursuant to registration rights or an available exemption from registration. Also, Water Oak, Ltd., a former owner of one of the Properties, will be issued Common OP Units with a value of approximately \$1,000,000 annually through 2009. In addition, as of December 31, 2000, 2,119,514 shares of Common Stock have been reserved for issuance pursuant to the Company's 1993 Employee Stock Option Plan and 1993 Non-Employee Director Stock Option Plan (the "Plans"). Under the Plans options for 553,378 shares have been exercised, and 188,750 shares of restricted stock have been issued as of December 31, 2000. Mr. Shiffman's employment agreement provides for incentive compensation payable in shares of Common Stock. The Company has also reserved 240,000 shares of Common Stock for issuance commencing January 31, 2002 pursuant to its Long Term Incentive Plan which is for the benefit of all salaried employees, other than officers, employed with the Company on or prior to December 31, 2000. No

prediction can be made regarding the effect that future sales of shares of Common Stock will have on the market price of shares.

Adverse Effect of Market Interest Rates on Price of Common Stock. One of the factors that may influence the price of the Common Stock in the public market will be the annual distributions to stockholders relative to the prevailing market price of the Common Stock. An increase in market interest rates may tend to make the Common Stock less attractive relative to other investments, which could adversely affect the market price of Common Stock.

## ITEM 2. PROPERTIES

General. At December 31, 2000, the Properties consisted of 99 manufactured housing communities, 5 recreational vehicle communities, and 5 properties containing both manufactured housing and recreational vehicle sites located in fifteen states concentrated in the midwestern and southeastern United States. At December 31, 2000, the Properties contained 38,282 developed sites comprised of 33,620 developed manufactured home sites and 4,662 recreational vehicle sites and an additional 2,392 manufactured home sites suitable for development. In addition, at December 31, 2000, the Company owned four undeveloped properties on which the Company plans to develop an aggregate of approximately 1,856 manufactured home sites. Most of the Properties include amenities oriented towards family and retirement living. Of the 109 Properties, 53 have more than 300 developed manufactured home sites, with the largest having 913 developed manufactured home sites.

The Properties had an aggregate occupancy rate of 95.0% as of December 31, 2000, excluding recreational vehicle sites. Since January 1, 2000, the Properties have averaged an aggregate annual turnover of homes (where the home is moved out of the community) of approximately 2.4% and an average annual turnover of residents (where the home is sold and remains within the community, typically without interruption of rental income) of approximately 8.6%.

The Company believes that its Properties' high amenity levels contribute to low turnover and generally high occupancy rates. All of the Properties provide residents with attractive amenities with most offering a clubhouse, a swimming pool, laundry facilities and cable television service. Many Properties offer additional amenities such as sauna/whirlpool spas, tennis, shuffleboard and basketball courts and/or exercise rooms.

The Company has sought to concentrate its communities within certain geographic areas in order to achieve economies of scale in management and operation. The Properties are principally concentrated in the midwestern and southeastern United States. The Company has identified Florida as a key market in which to expand its existing operations in the southeast because of Florida's stable tenant base, relatively low cost of living and attractive acquisition opportunities. Additionally, the Company's midwestern operations serve as a source of prospective tenants for the Florida Properties, which are generally oriented towards retirement living. Nevertheless, because the Company believes that geographic diversification will help insulate the portfolio from regional economic influences, the Company is also interested in expanding its operations in the western United States.

ITEM 7. MANAGEMENT'S DISCUSSION & ANALYSIS OF FINANCIAL  
CONDITION & RESULTS OF OPERATIONS

OVERVIEW

The following discussion and analysis of the consolidated financial condition and results of operations should be read in conjunction with the Consolidated Financial Statements and notes thereto.

RESULTS OF OPERATIONS

Comparison of year ended December 31, 2000 to year ended December 31, 1999

-----

For the year ended December 31, 2000, income before other, net and minority interests increased by \$4.9 million from \$36.6 million to \$41.5 million, when compared to the year ended December 31, 1999. The increase was due to increased revenues of \$11.6 million while expenses increased by \$6.7 million.

Income from property increased by \$7.0 million from \$125.4 million to \$132.4 million, or 5.6 percent, due to rent increases and other community revenues (\$5.3 million), acquisitions (\$3.1 million), lease up of manufactured home sites (\$2.2 million), offset by a revenue reduction of \$3.6 million due to the sale of communities during 1999.

Other income increased by \$4.6 million from \$9.5 million to \$14.1 million due primarily to an increase in interest income (\$3.0 million) and other income (\$2.7 million) offset by a \$1.1 million reduction in income from affiliate.

Property operating and maintenance expenses increased by \$1.3 million from \$27.3 million to \$28.6 million, or 4.7 percent, due primarily to acquisitions (\$0.8 million).

Real estate taxes increased by \$0.2 million from \$8.9 million to \$9.1 million, or 2.5 percent, due primarily to the acquired communities.

Property management expenses increased by \$0.3 million from \$2.6 million to \$2.9 million, or 11.2 percent, representing 2.2 percent and 2.1 percent of income from property in 2000 and 1999, respectively.

General and administrative expenses increased by \$0.4 million from \$3.7 million to \$4.1 million, or 10.8 percent, representing 2.8 percent and 2.7 percent of total revenues in 2000 and 1999, respectively.

Interest expense increased by \$2.4 million from \$27.3 million to \$29.7 million due primarily to investments in rental property and notes receivable.

Earnings before interest, taxes, depreciation and amortization ("EBITDA" an alternative financial performance measure that may not be comparable to similarly titled measures reported by other companies, defined as total revenues less property operating and maintenance, real estate taxes, property management and general and administrative expenses) increased by \$9.4 million from \$92.4 million to \$101.8 million. EBITDA as a percent of revenues increased to 69.5 percent in 2000 compared to 68.5 percent in 1999.

Depreciation and amortization expense increased by \$2.1 million from \$28.6 million to \$30.7 million due primarily to the acquisition and development/expansion of communities in 2000 and 1999.

The \$4.8 million gain included in other, net relates to property dispositions.

Comparison of year ended December 31, 1999 to year ended December 31, 1998  
 -----

For the year ended December 31, 1999, income before other, net and minority interests increased by \$5.2 million from \$31.4 million to \$36.6 million, when compared to the year ended December 31, 1998. The increase was due to increased revenues of \$14.9 million while expenses increased by \$9.7 million.

Income from property increased by \$11.1 million from \$114.3 million to \$125.4 million, or 9.7 percent, due to acquisitions (\$4.0 million), rent increases (\$4.1 million), lease up of manufactured home sites (\$1.7 million) and other community revenues (\$1.3 million).

Other income increased by \$3.5 million from \$5.7 million due primarily to an increase in interest income (\$3.2 million) and other income (\$0.7 million), offset by a \$0.4 million reduction in income from affiliate.

Property operating and maintenance expenses increased by \$1.7 million from \$25.6 million to \$27.3 million, or 6.4 percent, due primarily to acquisitions (\$1.0 million).

Real estate taxes increased by \$0.2 million from \$8.7 million to \$8.9 million, or 1.8 percent, due primarily to the acquired communities.

Property management expenses increased by \$0.3 million from \$2.3 million to \$2.6 million, or 16.3 percent, representing 2.1 percent and 2.0 percent of income from property in 1999 and 1998, respectively.

General and administrative expenses increased by \$0.4 million from \$3.3 million to \$3.7 million, or 10.3 percent, representing 2.7 percent and 2.8 percent of total revenues in 1999 and 1998, respectively.

Interest expense increased by \$3.3 million from \$24.0 million to \$27.3 million due primarily to investments in rental property and notes receivable.

EBITDA increased by \$12.1 million from \$80.3 million to \$92.4 million. EBITDA as a percent of revenues increased to 68.5 percent in 1999 compared to 66.8 percent in 1998.

Depreciation and amortization expense increased by \$3.6 million from \$25.0 million to \$28.6 million due primarily to the acquisition and development/expansion of communities in 1999 and 1998.

## SAME PROPERTY INFORMATION

The following table reflects property-level financial information as of and for the years ended December 31, 2000 and 1999. The "Same Property" data represents information regarding the operation of communities owned as of January 1, 1999 and December 31, 2000. Site, occupancy, and rent data for those communities is presented as of the last day of each period presented. The "Total Portfolio" column differentiates from the "Same Property" column by including financial information for managed but not owned communities, recreational vehicle communities, new development and acquisition communities.

(2) Includes 3 properties sold in December 2000.

On a same property basis, property revenues increased by \$5.0 million from \$95.4 million to \$100.4 million, or 5.2 percent, due primarily to increases in rents and occupancy related charges including water and property tax pass throughs. Also contributing to revenue growth was the increase of 93 leased sites at December 31, 2000 compared to December 31, 1999.

Property operating expenses increased by \$0.9 million from \$25.0 million to \$25.9 million, or 3.7 percent, due to increased occupancies and costs. Property EBITDA increased by \$4.0 million from \$70.4 million to \$74.4 million, or 5.7 percent.

## LIQUIDITY AND CAPITAL RESOURCES

Cash and cash equivalents increased by \$7.1 million to \$18.4 million at December 31, 2000 compared to \$11.3 million at December 31, 1999 because cash provided by operating and financing activities exceeded cash used in investing activities.

Net cash provided by operating activities increased by \$3.0 million to \$56.7 million for the year ended December 31, 2000 compared to \$53.7 million for the year ended December 31, 1999. This increase was primarily due to income before minority interests, depreciation and amortization and net gain from property dispositions increasing by \$3.8 million and other assets decreasing by \$1.9 million, offset by accounts payable and other liabilities decreasing by \$2.7 million.

Net cash used in investing activities decreased by \$11.0 million to \$69.1 million from \$80.1 million due to a \$9.8 million decrease in rental property acquisition activities and a \$5.6 million decrease in funds used for financing notes receivable offset by a \$2.2 million decrease in proceeds related to property dispositions and a \$2.2 million decrease in investment in and advances to affiliate.

Net cash provided by financing activities decreased by \$8.6 million to \$19.5 million for the year ended December 31, 2000 compared to \$28.1 million for the year ended December 31, 1999. This decrease was primarily because of a \$56.0 million reduction in borrowings on the line of credit, a \$50.8 million reduction in proceeds from common stock and Operating Partnership units and a \$1.7 million increase in distributions offset by proceeds of \$100 million received from the August 2000 issuance of senior notes which bear interest at 8.2 percent and mature August 15, 2008.

The Company expects to meet its short-term liquidity requirements generally through its working capital provided by operating activities. The Company expects to meet certain long-term liquidity requirements such as scheduled debt maturities and property acquisitions through the issuance of equity or debt securities, or interests in the Operating Partnership. The Company considers these sources to be adequate and anticipates they will continue to be adequate to meet operating requirements, capital improvements, investment in development, and payment of distributions by the Company in accordance with REIT requirements in both the short and long term. The Company may also meet these short-term and long-term requirements including debt maturities by utilizing its \$125 million line of credit which bears interest at LIBOR plus 1.0 percent and is due January 1, 2003. See "Safe Harbor Statement"

The terms of the \$35.8 million of Convertible Preferred Operating Partnership Units were renegotiated in the first quarter of 2000. The conversion price increased from \$27 to \$36 and the coupon rate was increased from 7 percent to 9 percent with equal serialized maturities in January 2003, 2004, 2005 and 2006.

At December 31, 2000, the Company's debt to total market capitalization approximated 36.8 percent (assuming conversion of all Common and Preferred OP Units to shares of common stock). The debt has a weighted average maturity of approximately 5.9 years and a weighted average interest rate of 7.4 percent.

Capital expenditures for the years ended December 31, 2000 and 1999 included recurring capital expenditures of \$4.6 million and \$5.9 million, respectively, including \$1.1 million in 1999 related to revenue producing capital expenditures consisting principally of water metering programs.

## RATIO OF EARNINGS TO FIXED CHARGES

The Company's ratio of earnings to fixed charges for the years ended December 31, 2000, 1999, and 1998 was 1.87:1, 1.95:1, and 2.03:1 respectively.

## INFLATION

Most of the leases allow for periodic rent increases which provide the Company with the opportunity to achieve increases in rental income as each lease expires. Such types of leases generally minimize the risk of inflation to the Company.

## SAFE HARBOR STATEMENT

This Form 10-K contains various "forward-looking statements" within the meaning of the Securities Act of 1933 and the Securities Exchange Act of 1934, and the Company intends that such forward-looking statements be subject to the safe harbors created thereby. The words "may", "will", "expect", "believe", "anticipate", "should", "estimate", and similar expressions identify forward-looking statements. These forward-looking statements reflect the Company's current views with respect to future events and financial performance, but are based upon current assumptions regarding the Company's operations, future results and prospects, and are subject to many uncertainties and factors relating to the Company's operations and business environment which may cause the actual results of the Company to be materially different from any future results expressed or implied by such forward-looking statements. Please see the section entitled "Factors That May Affect Future Results" for a list of uncertainties and factors.

Such factors include, but are not limited to, the following: (i) changes in the general economic climate; (ii) increased competition in the geographic areas in which the Company owns and operates manufactured housing communities; (iii) changes in government laws and regulations affecting manufactured housing communities; and (iv) the ability of the Company to continue to identify, negotiate and acquire manufactured housing communities and/or vacant land which may be developed into manufactured housing communities on terms favorable to the Company. The Company undertakes no obligation to publicly update or revise any forward-looking statements whether as a result of new information, future events, or otherwise.

## RECENT ACCOUNTING PRONOUNCEMENTS

In December 1999, the Securities and Exchange Commission ("SEC") issued Staff Accounting Bulletin No. 101 ("SAB 101"), "Revenue Recognition in Financial Statements". SAB 101 was adopted in the fourth quarter 2000. The Company examined its revenue recognition practices in light of interpretive guidance and determined SAB 101 will not have an effect on the earnings and financial position of the Company.

In June 1998, FASB issued SFAS No. 133 "Accounting for Derivative Instruments and Hedging Activities" ("SFAS 133"). This Statement establishes accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts, (collectively referred to as derivatives) and for hedging activities. The Company will adopt SFAS 133 as amended by SFAS 137 and 138 effective January 1, 2001, the application of which will have no effect on the earnings and financial position of the Company.

## OTHER

Funds from operations ("FFO") is defined by the National Association of Real Estate Investment Trusts ("NAREIT") as "net income (computed in accordance with generally accepted accounting principles) excluding gains (or losses) from sales of property, plus rental property depreciation and amortization, and after adjustments for unconsolidated partnerships and joint ventures." Industry analysts consider FFO to be an appropriate supplemental measure of the operating performance of an equity REIT primarily because the computation of FFO excludes historical cost depreciation as an expense and thereby facilitates the comparison of REITs which have different cost bases in their assets. Historical cost accounting for real estate assets implicitly assumes that the value of real estate assets diminishes predictably over time, whereas real estate values have instead historically risen or fallen based upon market conditions. FFO does not represent cash flow from operations as defined by generally accepted accounting principles and is a supplemental measure of performance that does not replace net income as a measure of performance or net cash provided by operating activities as a measure of liquidity. In addition, FFO is not intended as a measure of a REIT's ability to meet debt principal repayments and other cash requirements, nor as a measure of working capital. The following table calculates FFO data for both basic and diluted purposes for the years ended December 31, 2000, 1999 and 1998 (in thousands):

## ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

The Company's principal market risk exposure is interest rate risk. The Company does not hedge interest rate risk using financial instruments nor is the Company subject to foreign currency risk on its long-term debt, mortgage notes and other notes receivable. The Company's exposure to market risk for changes in interest rates relates primarily to refinancing long-term fixed rate obligations, the opportunity cost of fixed rate obligations in a falling interest rate environment and its variable rate line of credit. The Company primarily enters into debt obligations to support general corporate purposes including acquisitions, capital improvements and working capital needs.

The Company manages its exposure to interest rate risk on its variable rate indebtedness by borrowing on a short term basis under its line of credit until such time as it is able to retire the short term variable rate debt with a long term fixed rate debt offering on terms that are advantageous.

The Company's variable rate debt is limited to its \$125 million line of credit (\$12.0 million outstanding as of December 31, 2000) which bears interest at LIBOR plus 1.0 percent. If LIBOR increased/decreased by 1.0 percent during 2000 and 1999, the Company believes interest expense would have increased/decreased by approximately \$499,000 and \$588,000 based on the \$49.9 million and \$58.8 million average balance outstanding under the Company's line of credit for the year ended December 31, 2000 and 1999, respectively.

Additionally, the Company has \$85.2 million LIBOR based variable rate mortgage notes and other notes receivables at December 31, 2000. If LIBOR increased/decreased by 1.0 percent during 2000 and 1999, the Company believes interest income would have increased/decreased by approximately \$0.7 million and \$0.3 million based on the \$68.0 million and \$33.8 million average balance outstanding on all variable rate notes receivables for the year ended December 31, 2000 and 1999, respectively.

## REPORT OF INDEPENDENT ACCOUNTANTS

To the Board of Directors and Shareholders of  
Sun Communities, Inc.:

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of income, stockholders' equity and of cash flows present fairly, in all material respects, the financial position of Sun Communities, Inc. (the "Company") at December 31, 2000 and December 31, 1999, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index appearing under Item 14(a)(2) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedule are the responsibility of the Company's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America, which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
 DECEMBER 31, 2000, 1999 AND 1998

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

- A. BUSINESS: Sun Communities, Inc. and its subsidiaries (the "Company") is a real estate investment trust ("REIT") which owns and operates or finances 109 manufactured housing communities located in 15 states concentrated principally in the Midwest and Southeast comprising approximately 38,282 developed sites and approximately 2,392 sites suitable for development. In addition, the Company owns four undeveloped properties comprised of approximately 1,856 sites planned for future development.

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

- B. PRINCIPLES OF CONSOLIDATION: The accompanying financial statements include the accounts of the Company and all majority-owned and controlled subsidiaries including Sun Communities Operating Limited Partnership (the "Operating Partnership"). The minority interests include Common Operating Partnership Units ("OP Units") which are convertible into an equivalent number of shares of the Company's common stock. Such conversion would have no effect on earnings per share since the allocation of earnings to an OP Unit is equivalent to earnings allocated to a share of common stock. Of the 20.2 million OP Units outstanding, the Company owns 17.5 million or 86.7 percent. The minority interests are adjusted to their relative ownership interest whenever OP Units or common stock are issued, converted or retired by reclassification to/from paid-in capital.

Included in minority interests at December 31, 2000 and 1999 are 2 million Series A Perpetual Preferred OP Units ("Series A Units") issued at \$25 per unit in September 1999 bearing an annual coupon rate of 8.875 percent. The PPOP Units may be called by the Company at par on or after September 29, 2004, have no stated maturity or mandatory redemption and are convertible into preferred stock under certain circumstances.

Also included in minority interests are 1.3 million Preferred OP Units ("POP Units") issued at \$27 per unit bearing an annual cumulative dividend of \$2.43 and redeemable at par or convertible serially over a four year period beginning in January, 2003. The POP Units are convertible into 994,000 OP Units at prices up to \$36.00 per share. At prices above \$36.00 per share, the POP Units are convertible into OP Units based on a formula the numerator of which is \$36.00 plus 25 percent of stock price appreciation above \$36 per share. The denominator is the then stock price. The Company's stock price at December 31, 2000 was \$33.50.

In May 2000 and also included in minority interest, the Company issued 35,637 Series B Preferred OP Units ("Series B Units") at a \$100 mandatory redemption price with interest rates ranging from 7.0 percent to 9.0 percent and a maturity of May 1, 2006. The Company is subject to earlier redemption of 10,000 Series B Units upon the request of the holder on May 1, 2003 or a complete redemption of all Series B Units on May 1, 2004 or 2005.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED):

- C. RENTAL PROPERTY: Rental property is recorded at the lower of cost, less accumulated depreciation or fair value. Management evaluates the recoverability of its investment in rental property whenever events or changes in circumstances such as recent operating results, expected net operating cash flow and plans for future operations indicate that full asset recoverability is questionable. Recoverability of these assets is measured by a comparison of the carrying amount of such assets to the future undiscounted net cash flows expected to be generated by the assets. If such assets were deemed to be impaired as a result of this measurement, the impairment that would be recognized is measured by the amount by which the carrying amount of the asset exceeds the fair value of the asset as determined on a discounted net cash flow basis.

Depreciation is computed on a straight-line basis over the estimated useful lives of the assets. Useful lives are 30 years for land improvements and buildings and 7 to 15 years for furniture, fixtures and equipment.

Expenditures for ordinary maintenance and repairs are charged to operations as incurred and significant renovations and improvements, which improve and/or extend the useful life of the asset, are capitalized and depreciated over their estimated useful lives. Construction costs related to new community or expansion sites development including interest are capitalized until the property is substantially complete.

- D. CASH AND CASH EQUIVALENTS: The Company considers all highly liquid investments with an initial maturity of three months or less to be cash and cash equivalents.
- E. INVESTMENTS IN AND ADVANCES TO AFFILIATE: Sun Home Services ("SHS") provides home sales and other services to current and prospective tenants. Through the Operating Partnership, the Company owns 100 percent of the outstanding preferred stock of SHS, is entitled to 95 percent of the operating cash flow, and accounts for its investment utilizing the equity method of accounting. The common stock is owned by two officers of the Company and the estate of a former officer of the Company who collectively are entitled to receive 5 percent of the operating cash flow.
- F. REVENUE RECOGNITION: Rental income attributable to leases is recorded on a straight-line basis when earned from tenants. Leases entered into by tenants generally range from month-to-month to one year and are renewable by mutual agreement of the Company and resident or, in some cases, as provided by state statute.
- G. FAIR VALUE OF FINANCIAL INSTRUMENTS: The carrying value of financial instruments which includes cash and cash investments, mortgages and notes receivable and debt approximates fair value. Fair values have been determined through information obtained from market sources and management estimates.
- H. RECLASSIFICATIONS: Certain 1999 and 1998 amounts have been reclassified to conform with the 2000 financial statement presentation. Such reclassifications have no effect on results of operations as originally presented.

Land improvements and buildings consist primarily of infrastructure, roads, landscaping, clubhouses, maintenance buildings and amenities. Included in rental property at December 31, 2000 and 1999 are net carrying amounts related to capitalized leases of \$39.7 million and \$40.8 million, respectively.

During 2000, the Company acquired three manufactured housing communities comprising 659 developed sites for \$21.1 million. During 1999, the Company acquired eight communities comprising 1,485 developed sites and 370 sites suitable for development for \$32.0 million and three development communities comprising 1,538 sites, some of which were partially developed, for \$9.5 million. These transactions have been accounted for as purchases, and the statements of income include the operations of the acquired communities from the dates of their respective acquisitions. As of December 31, 2000, in conjunction with a 1993 acquisition, the Company is obligated to issue \$9.2 million of OP Units through 2009 based on the per share market value of the Company's stock on the issuance date. This obligation was accounted for as part of the purchase price of the original acquisition.

The Company has a \$125 million unsecured line of credit at LIBOR plus 1.0% maturing in January 2003, of which \$113 million was available at December 31, 2000. The average interest rate of outstanding borrowings at December 31, 2000 was 7.06% following conversion to LIBOR in January 2001.

SUN COMMUNITIES, INC.  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
 DECEMBER 31, 2000, 1999 AND 1998

4. DEBT (CONTINUED) (AMOUNTS IN THOUSANDS):

The term loan is collateralized by seven communities comprising approximately 3,400 sites. The capitalized lease obligations and mortgage notes are collateralized by thirteen communities comprising approximately 3,200 sites. At the lease expiration date of the capitalized leases the

Company has the right and intends to purchase the properties for the amount of the then outstanding lease obligation. Annual payments under these capitalized lease obligations are \$2.1 million in 2001 and 2002 and \$0.8 million in 2003.

At December 31, 2000, the maturities of debt, excluding the line of credit, during the next five years are approximately as follows: 2001 - \$76.5 million; 2002 - \$17.4 million; 2003 - \$86.5 million; 2004 - \$11.9 million; and 2005 - \$1.3 million.

5. STOCK OPTIONS:

Data pertaining to stock option plans are as follows:

	2000 -----	1999 -----	1998 -----

Options exercisable, December 31 ..	827,329(a)	709,811	601,410

(a) There are 273,400 options outstanding and exercisable which range from \$20.00 - \$27.99 with a weighted average life of 4.0 years related to the outstanding options. The weighted average exercise price for these outstanding and exercisable options is \$22.81. There are 835,850 and 553,933 options outstanding and exercisable, respectively, which range from \$28.00 - \$35.99 with a weighted average life of 5.0 years related to the outstanding options. The weighted average exercise price for these outstanding and exercisable options is \$31.08 and \$30.29, respectively.

At December 31, 2000, 509,904 shares of common stock were available for the granting of options. Stock option plans originally provided for the grant of up to 2,120,000 options. Options are granted at fair value and generally vest over a two-year period and may be exercised for 10 years after date of grant. In addition, the Company established a Long-Term Incentive Plan for certain employees granting up to 240,000 options in 1997, which become exercisable in equal installments in 2002-2004 based on corporate profit performance.

The Company has opted to measure compensation cost utilizing the intrinsic value method. The fair value of each option grant was estimated as of the date of grant using the Black-Scholes option-pricing model with the following assumptions for options granted:

Risk-free rate of return.....	6.4%	6.4%	5.4%
Expected option term (in years).....	6	6	4

If compensation cost for stock option grants had been recognized based on the fair value at the grant date, this would have resulted in net income of \$33.1 million, \$28.8 million and \$25.8 million and basic net income per share of \$1.91, \$1.68 and \$1.53 in 2000, 1999 and 1998, respectively.

6. STOCKHOLDERS' EQUITY:

In April 1998, the Company declared a dividend of one Preferred Stock Purchase Right (Right) for each outstanding share of common stock. The Rights are not presently exercisable. Each Right entitles the holder, upon the occurrence of certain specified events, including a material change in the ownership of the Company, to purchase preferred stock and common stock, from the Company and/or from another person into which the Company is merged or which acquires control of the Company.

The Rights, which were not given dividend accounting recognition due to the amount involved, may be generally redeemed by the Company at a price of \$0.01 per Right or \$0.2 million in total. The Rights expire on June 8, 2008.

In December 1999, and June 1998, the Company issued restricted stock awards of 24,750 at \$30.00 per share and 165,000 at \$34.12 per share, respectively, to officers and certain employees which are being amortized over their five to ten year vesting period. Compensation cost recognized in income for these stock awards was \$0.7 million, \$0.6 million and \$0.3 million in 2000, 1999 and 1998, respectively.

In December 1998, the Company issued common stock and OP units aggregating \$25.5 million to directors, employees and consultants. The purchase was financed by personal bank loans guaranteed by the Company until the loans mature in January 2004. No compensation expense was recognized in respect to the guarantees as the fair value thereof was not material nor have there been any defaults.

8. INCOME TAXES (AMOUNTS IN THOUSANDS):

The Company has elected to be taxed as a real estate investment trust ("REIT") as defined under Section 856(c) of the Internal Revenue Code of 1986, as amended. In order for the Company to qualify as a REIT, at least 95 percent of the Company's gross income in any year must be derived from qualifying sources.

As a REIT, the Company generally will not be subject to U.S. Federal income taxes at the corporate level if it distributes at least 95 percent of its REIT ordinary taxable income to its stockholders. REIT's are also subject to a number of other organizational and operational requirements. If the Company fails to qualify as a REIT in any taxable year, its taxable income will be subject to U.S. Federal income tax at regular corporate rates (including any applicable alternative minimum tax). Even if the Company qualifies as a REIT, it may be subject to certain state and local income taxes and to U.S. Federal income and excise taxes on its undistributed income.

(a) Operating income is defined as total revenues less property operating and maintenance expense, real estate tax expense, property management and general and administrative expenses. Operating income is a measure of the performance of the operations of the properties before the effects of depreciation, amortization and interest expense. Operating income is not necessarily an indication of the performance of the Company or a measure of liquidity.

(b) Net income includes net gains on the disposition of properties of \$182 in the fourth quarter of 2000, \$4,619 in the third quarter of 2000 and \$829 in the fourth quarter of 1999.

## EXHIBIT 12.1

COMPUTATION OF RATIO OF EARNINGS TO FIXED CHARGES  
AND RATIO OF EARNINGS TO COMBINED FIXED CHARGES AND PREFERRED DISTRIBUTIONS

The ratio of earnings to fixed charges for the Company (including its subsidiaries and majority-owned partnerships) presents the relationship of the Company's earnings to its fixed charges. "Earnings" as used in the computation, is based on the Company's net income from continuing operations (which includes a charge to income for depreciation and amortization expense) before income taxes, plus fixed charges. "Fixed charges" is comprised of (i) interest charges, whether expensed or capitalized, and (ii) amortization of loan costs and discounts or premiums relating to indebtedness of the Company and its subsidiaries and majority-owned partnerships, excluding in all cases items which would be or are eliminated in consolidation.

The Company's ratio of earnings to combined fixed charges presents the relationship of the Company's earnings (as defined above) to fixed charges (as defined above).
