Acquisitions (3)

As previously announced, the Company acquired three recreational vehicle communities for \$76.1 million in cash; two in Maryland and one in Florida. The properties contain 1,185 developed sites and approximately 290 sites available for expansion. These high quality resorts compliment the Company's geographic mix in the highly desirable areas of Ocean City, Maryland and Central Florida.

Since March of this year the Company has acquired 12 communities (8 manufactured home communities and 4 recreational vehicle resorts) for approximately \$400.0 million resulting in the addition of over 5,300 developed sites to the portfolio.

Dispositions

The Company completed the sale of the six manufactured home communities that was announced in its second quarter earnings press release in two separate closings. On August 19, 2015, three of the manufactured home communities, associated homes and notes, (two in Ohio and one in Michigan) comprised of approximately 900 developed sites were sold for \$32.5 million. On October 16, 2015, the Company sold the three remaining manufactured home communities, associated homes and notes for \$36.1 million. The properties were located in Indiana and contained approximately 1,250 developed sites. Proceeds from the dispositions were used to pay down the Company's line of credit.

"We continue to evaluate a steady flow of both manufactured home communities and recreational vehicle resort acquisition opportunities and seek to capitalize on our opportunity to re-cycle funds from our dispositions into purchased communities which provide higher long term value for our shareholders," said Shiffman.

Debt Transactions

As previously disclosed, the Company entered into a senior line of credit facility in the amount of \$450.0 million (the "Facility"). The Facility is comprised of a \$392.0 million revolving loan and a \$58.0 million term loan and has an accordion feature allowing up to \$300.0 million in additional borrowing upon the satisfaction of certain conditions. The four-year facility also contains two six-month extension options and bears interest at a floating rate based on Eurodollar plus a margin that is determined based on the Company's leverage ratio, which can range from 1.40% to 2.25% for the revolving loan and 1.35% to 2.20% for the term loan. The Facility replaced the Company's \$350.0 million senior secured revolving line of credit which was scheduled to mature on May 14, 2017.

The Company entered into an agreement in August 2015 to borrow \$87.0 million in mortgage debt that will be secured by five communities at an interest rate of 4.06% for a term of 25 years and will be completed in two separate closings. On September 24, 2015, the Company completed the first closing for \$51.2 million secured by four communities. The second closing, for \$35.8 million, is scheduled to close in December 2015.

Equity Transactions

As previously announced, the Company repurchased 4,066,586 shares of the Company's 6.50% Series A-4 Cumulative Convertible Preferred Stock pursuant to a repurchase agreement with certain holders. Each Series A-4 preferred share was purchased at a price equal to \$30.90 plus \$0.18 for accrued and unpaid distributions through August 9, 2015. In aggregate the Company repurchase totaled \$126.4 million, which was funded using the Company's line of credit. After the repurchase there are 2,298,184 Series A-4 preferred shares outstanding.

The Company sold 608,100 common shares using its at-the-market program at an average sales price of \$68.00 for net proceeds of \$40.8 million during the three months ended September 30, 2015, which were used to pay down the Company's line of credit.

Guidance

The Company is narrowing the range of its previously provided guidance for full year 2015 FFO⁽¹⁾ excluding certain items to \$3.65 - \$3.69 per Share. The guidance provided is subject to the estimates and assumptions previously disclosed and the following: (a) includes all acquisitions and dispositions completed through October 27, 2015, but no prospective acquisitions or dispositions and (b) the assumption that certain non-core items are adjusted from FFO⁽¹⁾ as noted in the table contained in this press release.

The estimates and assumptions presented above are forward-looking based on the Company's current assessment of economic and market conditions, as well as other risks outlined below under the caption "Forward-Looking Statements."

(1) Funds from operations attributable to Sun Communities, Inc. common stockholders and dilutive convertible securities ("FFO") is defined by the National Association of Real Estate Investment Trusts ("NAREIT") as net income (loss) (computed in accordance with generally accepted accounting principles "GAAP"), excluding gains (or losses) from sales of depreciable operating property, plus real estate-related depreciation and amortization, and after adjustments for unconsolidated partnerships and joint ventures. FFO is a non-GAAP financial measure that management believes is a useful supplemental measure of the Company's operating performance. Management generally considers FFO to be a useful measure for reviewing comparative operating and financial performance because, by excluding gains and losses related to sales of previously depreciated operating real estate assets, impairment and excluding real estate asset depreciation and amortization (which can vary among owners of identical assets in similar condition based on historical cost accounting and useful life estimates), FFO provides a performance measure that, when compared year over year, reflects the impact to operations from trends in occupancy rates, rental rates and operating costs, providing perspective not readily apparent from net loss. Management believes that the use of FFO has been beneficial in improving the understanding of operating results of REITs among the investing public and making comparisons of REIT operating results more meaningful. FFO is computed in accordance with the Company's interpretation of standards established by NAREIT, which may not be comparable to FFO reported by other REITs that do not define the term in accordance with the current NAREIT definition or that interpret the current NAREIT definition differently than the Company.

Because FFO excludes significant economic components of net income (loss) including depreciation and amortization, FFO should be used as an adjunct to net income (loss) and not as an alternative to net income (loss). The principal limitation of FFO is that it does not represent cash flow from operations as defined by GAAP and is a supplemental measure of performance that does not replace net income (loss) as a measure of performance or net cash provided by operating activities as a measure of liquidity. In addition, FFO is not intended as a measure of a REIT's ability to meet debt principal repayments and other cash requirements, nor as a measure of working capital. FFO only provides investors with an additional performance measure.

- Investors in and analysts following the real estate industry utilize NOI as a supplemental performance measure. NOI is derived from revenues minus property operating expenses and real estate taxes. NOI does not represent cash generated from operating activities in accordance with GAAP and should not be considered to be an alternative to net income (loss) (determined in accordance with GAAP) as an indication of the Company's financial performance or to be an alternative to cash flow from operating activities (determined in accordance with GAAP) as a measure of the Company's liquidity; nor is it indicative of funds available for the Company's cash needs, including its ability to make cash distributions. The Company believes that net income (loss) is the most directly comparable GAAP measurement to NOI. Net income (loss) includes interest and depreciation and amortization which often have no effect on the market value of a property and therefore limit its use as a performance measure. In addition, such expenses are often incurred at a parent company level and therefore are not necessarily linked to the performance of a real estate asset. The Company believes that NOI is helpful to investors as a measure of operating performance because it is an indicator of the return on property investment, and provides a method of companing property performance over time. The Company uses NOI as a key management tool when evaluating performance and growth of particular properties and/or groups of properties. The principal limitation of NOI is that it excludes depreciation, amortization, interest expense, and non-property specific expenses such as general and administrative expenses, all of which are significant costs, and therefore, NOI is a measure of the operating performance of the properties of the Company rather than of the Company overall.
- (3) The consideration amounts presented with respect to acquired communities represent the economic transaction and do not contemplate the fair value purchase accounting required by GAAP.
