SUN COMMUNITIES, INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF

FINANCIAL CONDITION AND RESULTS OF OPERATIONS

LIQUIDITY AND CAPITAL RESOURCES
Cash and cash equivalents decreased by $10.8 million to $7.7 million at June 30, 2001 from $18.5 million at December 31, 2000 because cash used for financing and investing activities exceeded cash provided by operating activities.

Net cash provided by operating activities increased by $10.2 million to $39.3 million for the six months ended June 30, 2001 compared to $29.1 million for the same period in 2000. This increase was primarily due to accounts payable and other liabilities increasing by $4.0 million, other assets decreasing by $4.0 million and a $2.2 million increase in income before minority interests, depreciation and amortization and gain from property dispositions, net.

Net cash used in investing activities decreased by $48.7 million to $7.8 million for the six months ended June 30, 2001 compared to $56.5 million for the same period in 2000. This decrease was primarily due to a $21.9 million decrease in investments in notes receivable, net, proceeds related to property dispositions of $17.3 million and $15.3 million related to investments in and advances to affiliates, offset by a $5.8 million increase in rental property acquisition activities.

Net cash used in financing activities was $42.4 million for the six months ended June 30, 2001 compared to $22.7 million provided by financing activities during the same period in 2000. This change was primarily because of $74.5 million in additional repayments on notes payable and other debt, treasury stock and operating partnership unit purchases increasing by $5.8 million, distributions increasing by $0.8 million, offset by $16.0 million in additional line of credit borrowings.

The Company expects to meet its short-term liquidity requirements generally through its working capital provided by operating activities. The Company expects to meet certain long-term liquidity requirements such as scheduled debt maturities and property acquisitions through the issuance of equity or debt securities, or interests in the Operating Partnership. The Company considers these sources to be adequate and anticipates they will continue to be adequate to meet operating requirements, capital improvements, investment in development, and payment of distributions by the Company in accordance with REIT requirements in both the short and long term. The Company may also meet these short-term and long-term requirements by utilizing its $125 million line of credit which bears interest at LIBOR plus 1.0% and is due January 1, 2003.

At June 30, 2001, the Company's debt to total market capitalization approximated 36.1% (assuming conversion of all Common OP Units to shares of common stock and including Preferred OP Units). The debt has a weighted average maturity of approximately 5.9 years and a weighted average interest rate of 7.0%.

Recurring capital expenditures approximated $1.9 million and $2.0 million for the six months ended June 30, 2001 and 2000, respectively.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF

FINANCIAL CONDITION AND RESULTS OF OPERATIONS

OTHER

Funds from operations ("FFO") is defined by the National Association of Real Estate Investment Trusts ("NAREIT") as "net income (computed in accordance with generally accepted accounting principles) excluding gains (or losses) from sales of property, plus rental property depreciation and amortization, and after adjustments for unconsolidated partnerships and joint ventures." Industry analysts consider FFO to be an appropriate supplemental measure of the operating performance of an equity REIT primarily because the computation of FFO excludes historical cost depreciation as an expense and thereby facilitates the comparison of REITs which have different cost bases in their assets. Historical cost accounting for real estate assets implicitly assumes that the value of real estate assets diminishes predictably over time, whereas real estate values have instead historically risen or fallen based upon market conditions. FFO does not represent cash flow from operations as defined by generally accepted accounting principles and is a supplemental measure of performance that does not replace net income as a measure of performance or net cash provided by operating activities as a measure of liquidity. In addition, FFO is not intended as a measure of a REIT's ability to meet debt principal repayments and other cash requirements, nor as a measure of working capital. The following table calculates FFO for both basic and diluted purposes for the periods ended June 30, 2001 and 2000 (in thousands):

This Form 10-Q contains various "forward-looking statements" within the meaning of the Securities Act of 1933 and the Securities Exchange Act of 1934, and the Company intends that such forward-looking statements be subject to the safe harbors created thereby. The words "may", "will", "expect", "believe", "anticipate", "should", "estimate", and similar expressions identify forward-looking statements. These forward-looking statements reflect the Company's current views with respect to future events and financial performance, but are based upon current assumptions regarding the Company's operations, future results and prospects, and are subject to many uncertainties and factors relating to the Company's operations and business environment which may cause the actual results of the Company to be materially different from any future results expressed or implied by such forward-looking statements. Please see the section entitled "Factors That May Affect Future Results" of the Company's Annual Report on Form 10-K for the year ended December 31,2000 filed with the Securities and Exchange Commission for a list of uncertainties and factors.

Such factors include, but are not limited to, the following: (i) changes in the general economic climate; (ii) increased competition in the geographic areas in which the Company owns and operates manufactured housing communities; (iii) changes in government laws and regulations affecting manufactured housing communities; and (iv) the ability of the Company to continue to identify, negotiate and acquire manufactured housing communities and/or vacant land which may be developed into manufactured housing communities on terms favorable to the Company. The Company undertakes no obligation to publicly update or revise any forward-looking statements whether as a result of new information, future events, or otherwise.

Recent Accounting Pronouncements

In June 2001, the Financial Accounting Standards Board ("FASB") approved Statement of Financial Accounting Standards ("SFAS") No. 141, "Business Combinations and SFAS No. 142, "Goodwill and Other Intangible Assets." SFAS 141 requires, among other things, that the purchase method of accounting for business combinations be used for all business combinations initiated after June 30, 2001. SFAS 142 addresses the accounting for goodwill and other intangible assets subsequent to their acquisition. SFAS 142 requires, among other things, that goodwill and other indefinite-lived intangible assets no longer be amortized and that such assets be tested for impairment at least annually. SFAS 142 is effective for fiscal years beginning after December 15, 2001. The Company is currently evaluating the impact these standards will have on its financial statements.

In June 1998, FASB issued SFAS No. 133 "Accounting for Derivative Instruments and Hedging Activities" ("SFAS 133"). This statement establishes accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts, (collectively referred to as derivatives) and for hedging activities. The Company adopted SFAS 133 as amended by SFAS 137 and 138 effective January 1, 2001. There was no effect from the application of SFAS 133 on the earnings and financial position of the Company as the Company had no derivative instruments at June 30, 2001 and December 31, 2000.
